

# The Carbon Chronicle

An Independent Newspaper Published in the interests of Carbon and District

VOLUME 7: NUMBER 48.

CARBON, ALBERTA, THURSDAY, JANUARY 2, 1930

\$2.00 A YEAR IN ADVANCE

## "STAR BRIGHT" TO PLAY HERE JAN. 10

The play "Star Bright," that was so successfully staged in Carbon early in December will again be played in Carbon in the Elk's hall on Friday, January 10th. This play was well received both in Carbon and Belseker and it is anticipated that many who saw the play will again be present and those who could not attend before will now have the opportunity to do so.

After the play a dance will be held in the hall and no extra admission will be charged to those attending the play. For those wishing to take in the dance only a charge of 50c will be made.

Mrs. Barr's orchestra has been engaged to play for the occasion.

## WHEAT PRICE STRENGTHENED

Two important factors combined this week to lend added strength to the wheat market and boost the prices farmers will receive for their grain.

The first was the announcement on Saturday that the U.S. Farmers' National Grain Corporation had gone into the Chicago market with a bid of \$1.18 for No. 1 hard wheat, country run, and that similar action would be taken in all the principal markets. Winnipeg prices shot up sensationally. Strong cables from Liverpool also helped to create a firm market.

An unexpected low estimate of the Argentine wheat yield was given out Tuesday by that country's department of agriculture, and had the effect of creating a five cent jump in the price of wheat.

The Argentine government's estimate is some 44,000,000 bushels less than the wheat pool's last announced figure of 187,000,000 bushels. George McIvor, general sales manager for the Pool, recently stated his organization estimated that only some 52,000,000 bushels remained to be marketed from Argentina up to the end of July 1930, a drastic reduction from last year's figure.

"Should the Argentine government crop estimate be borne out by later threshing returns, it will mean a very substantial decrease in the quantity of grain available for export from that country," Mr. McIvor said. "Domestic requirements for seed and flour in the Argentine are estimated at about 88,000,000. Unless there is a drastic reduction in the Argentine carry-over next season, the quantity available for shipment will be the lowest in many years."

## CARD OF THANKS

We wish to thank the subscribers who so kindly remembered us at Christmas time and take this opportunity of wishing everyone—

A HAPPY NEW YEAR

Alberta Government Telephones,  
MRS. C. MOORHOUSE & STAFF

## PUBLIC SCHOOL REPORT

GRADE IA—Pauline Schoeppe, Betty Willson, Marjorie Shale, Ralph Atkinson, Lillian Dixon, June Collins, absent, Ellen Hedberg.

GRADE IB—Mary Mayers, Zena Trumbley, Arbor Collins, Duncan Code, Boleck Sobyski, Albert Batsch, Lawrence Trepanier.

GRADE IIA—Margaret Wheat, Elaine Torrance, Jimmie Gouldie, Milly Hunt, Isobel Gouldie, Bill Code, Elwood Kaehn, Mae Moore, Irene Soltes, Harvey Barker, Bernard Moore, Mary Shyika, Annie Lemay, Gordon McGregor, Betty Rogers.

GRADE IIB—Alberty Bramley, Robert Ramsey, Annie Shyika, George Moore, Lucille Lemay, Billy Heath, Edward Batsch, Victor Kaehn, absent for tests, Irene Grenier.

## NEW CURLING RINK OPENED AT WAYNE LAST WEEK

The little sporty town of Wayne added another line to their sport activities, when on Sunday last they celebrated the opening of their very fine curling rink.

Through a generous donation by the Rosedeer Coal Co. of a large building a start in the roaring game was enabled to be made. Two fine sheets of ice were ready last Sunday when the opening took place, and many rocks found their way from end to end by a number of enthusiasts of the game.

## AMPLE SEED GRAIN FOR SPRING

According to official reports issued it is believed that the seed grain supply available for next spring will be sufficient. This, however, depends largely on satisfactory distribution from those districts where surpluses exist to point where there is a shortage.

Southern and south-eastern Alberta, southern and central Saskatchewan, and southern and south western Manitoba, except in a few localities, will likely need seed oats and barley in large quantity and some seed wheat. Fortunately, the northern parts of these provinces, and particularly northern and north western Alberta, including the Peace River country, had good crops this year, from which the necessary supply may be secured. Large initial shipments from these sources are reported already by seed houses and the Saskatchewan government, a premium of about 10 cents a bushel being paid above the commercial price for grain capable of cleaning to seed grade.

Mr. and Mrs. J. Dalzel, of De Winton, are visiting with relatives in this district over the festive season.

How unfortunate that the people who know just what the stock market is going to do are behind with their rent.

## LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. Govin of Rosebud, spent Christmas at the home of D. Charlebois.

J. A. MacDonald was a Calgary visitor on Tuesday and returned Wednesday morning.

Miss Olive Charlebois spent Tuesday of this week in Calgary.

School does not re-open till Monday, December 6th.

Jack Spence spent Christmas at his home in Suffield, Alta. He returned to Carbon on Friday last.

Born, on Monday, December 23, to Mr. and Mrs. Walter Gouldie, a daughter.

Dr. A. J. Wright returned to Edmonton on Friday last after spending Christmas at the home of his parents, Mr. and Mrs. S. N. Wright.

Miss Kate Ramsay was a Calgary visitor last week.

A. R. Lynn spent Christmas with friends at Oils.

Joe Robinson of Calgary is visiting at the home of Mr. and Mrs. T.J. Ramsay.

Curling has not been very enjoyable the past week owing to the mild weather, but it is hoped that it will turn a little colder in the near future.

Miss McNichol of Medicine Hat spent Christmas with her father, the Rev. Wm. McNichol.

Miss Kathleen Watkins spent Christmas at her home south of Calgary.

Mr. and Mrs. S. McLeod of Calgary spent Christmas at the home of Mr. and Mrs. R. C. Barr.

Mr. and Mrs. C. W. Gray were visiting in Calgary the latter part of the week, the guests of their daughter.

—Don't forget the Social evening and dance in the Elks' Hall on Thursday evening. No admission charge will be made and everybody is welcome. One of the main features of the program will be a debate, "Resolved that the pulpit has more influence than the press." The speakers will be, Affirmative—Hugh MacDonald and Gordon Ramsay. Negative—Wilfred Poxon and Jack Code. Following the debate a dance will be held and refreshments will be served. There will also be other items on the program, which will commence about 9 p.m.

## FROST BITE

One day recently during the few days of below zero weather, a boy of sixteen, a new comer to the West, was taken to a hospital with both hands frozen white. He had been in Canada only two months and having come from Scotland did not know the danger of exposing his bare hands when the temperature was twenty-eight below zero with a little chill wind blowing. However, he knows now, and will take care in future.

For those new-comers to our Canadian West who have not weathered a winter with us, this article is written. If nose, ears, fingers or toes lose feeling and appear a cold white, start friction with snow or a piece of ice at once and keep up till a pink glow appears in the affected part. If possible, put hands or feet in cold water and keep there for an hour or more and then use friction until circulation has been completely established.

Never put in hot water, nor place near a fire.

A person found frozen to unconsciousness should be placed in a cold room and friction with cloth wrung out of ice cold water applied to body with hand friction to extremities. This to be kept up until circulation is re-established. Then patient is placed between warm blankets and given a hot drink.

## SERGEANT PURDY TO TESTIFY IN MONTANA THEFT CASE

Action by the United States authorities following the discovery of an alleged liquor-running gang between Calgary and Great Falls, Montana, followed by the deportation of Walter Ezra Kennedy and John Mamusick, has been taken and on January 6 both men will be arranged before a grand jury at Helena, Mont., when a preliminary hearing pending indictment on charges of stealing the plane will take place.

Sergeant R.H. Purdy, headquarters sergeant of "C" Division, Alberta Provincial Police, who was at the head of the investigation in Calgary, will leave or Helena on that date.

During the evening of October 23, a Waco biplane landed in the Chinook race track. Investigation by sergeant Purdy and the liquor squad of Calgary resulted in the arrest of Kennedy, with a borrowed automobile containing \$385 worth of liquor and a complete aviator's outfit. Kennedy was charged with purchasing liquor under an assumed name, was fined and deported. Mamusick, alleged pilot of the plane, appeared in court and also faced a liquor charge but was subsequently freed and sent back to Montana.

The plane was painted yellow with black trimmings and aluminum colored wings. In large gold letters on the engine cover were the words "Dr. Offerman, Great Falls, Montana." A government plate declared the owner to be F.K. Offerman, Great Falls, and that the machine was not licensed.

The plane was seized by the Canadian Customs department and is still in the custody of the department in Calgary. Sergeant Purdy was notified that he would be wanted to testify as to his investigations.

## "THE DOCKS OF NEW YORK" TO BE SHOWN AT CARBON THEATRE FRIDAY & SAT'DAY

(Synopsis of story)

A tramp steamer docks at New York. Just after Bill Roberts (George Bancroft), and Sugar Steve (Clyde Cook), stokers, come ashore for a "bust." Bill rescues a woman who has jumped off a pier. He carries her to a waterfront inn where she revives. The woman, Sadie (Betty Compson) is tired and bitter with her sordid life in sailor's dance halls. He gets her some dry clothes, and later joins her at a table in the inn. She admires his rugged strength, he is intrigued with her beauty.

Bill's domineering boss, the Third Engineer, has also come ashore, and has met and made up with Lou (Bacalova), his wife. Deserted, she has taken to the streets. Insincere, he tries to dance with Sadie, but Bill knocks him down. Although jealous, Lou defends her husband from further attack.

Bill flatters Sadie, telling her she is too good for the life she leads. Bluffing, he says he will marry her. Inflamed by drink, he makes good his bluff. Hymn Book Harry (Gustaf von Seyffertitz) a mission worker, is prevailed upon to marry them. He marries them in riotous ceremony in the Inn. They promise to get a license the next day.

The next morning Bill sneaks away from his new wife before she awakens. The Third Engineer sees him leave, tells Sadie and makes love to her himself. Lou, who knows he means to desert her again, surprises him with Sadie and shoots him. Bill returns when he hears Sadie is accused of the murder, but Lou confesses. Then Sadie realizes that he is deserting her and she starts off again to commit suicide.

As the steamer pulls away from the docks of New York, Bill in the stokehold realizes he really loves Sadie. He dives overboard and swims ashore. On the waterfront he hears she has been arrested for stealing the clothes he got her the night before. He goes to court and confesses he stole them. Sadie is radiantly happy as Bill tells her sixty days won't be long to wait.

## Snicklefritz ----

A canoe is like a small boy—both behave better when paddled from the rear.

\*\*\*\*\*  
A golden wedding is when a couple have gone fifty-fifty.

\*\*\*\*\*  
Teacher: "Willie, do you mean to say that you can't name all the presidents we've had? When I was your age I could name them all."

Willie: "Yes, but there were only three or four then."

\*\*\*\*\*  
Reporter (Interviewing millionaire): "Perhaps some good book has helped you most in your wonderful career?"  
Millionaire: "Undoubtedly; my bank book."

\*\*\*\*\*  
"Why is Mabel so angry? The papers gave a full account of her wedding."

"Yes, they put, 'Miss Blackfield was married to the well-known collector of antiques.'"

\*\*\*\*\*  
"But can you cook?" asked the prosaic young man.

"Let us take these things up in their proper order," returned the wise maiden. "The matter of cooking is not the first thing to be considered."

"Then what is the first?" he demanded.

"Can you provide the things to be cooked?"

\*\*\*\*\*  
New Vicar: "Quite a lot of people had coughs during the sermon this morning."

Vergar: "Coughs?" They ain't coughs, sir; that's time signals."

\*\*\*\*\*  
Two boon companions were on their way homeward from a Christmas Eve party. They had dined and wine well and were quite jovial. They came to a postal box. "Pardon me, old top," said one, "I must try this machine." He dropped a dime in the slot. Then gazing at the city hall clock, said in horrified tones, "Migaud, I've losht twelve pounds since yesterday."

\*\*\*\*\*  
I hate my woolen underwear!  
I'm mad enough to bawl!  
It itches here, it itches there!  
The darned itch seems to crawl!  
And when I start to scratch somewhere  
That ain't the place at all!

\*\*\*\*\*  
"I wonder why they say 'Amen' and not 'Awomen,' Bobby?"  
"Because they sing hymns and not hers."

\*\*\*\*\*  
A Second What?  
Wife: I thought, James, you were only going out for a second?  
James: Yes, dear. And I've had it.

\*\*\*\*\*  
On With the Dance  
"May I have the next dance, please, Miss Smith?"  
"Sorry; I'm engaged."  
"What does that matter? I'm married."

\*\*\*\*\*  
"Ouch! I bumped my crazy bone!"  
"Oh, well, comb your hair right and the bump won't show."

\*\*\*\*\*  
It may be chivalry to give the woman right of way now, but it's also common sense.

\*\*\*\*\*  
Tillie: "Don't you ever cry when your father whips you?"  
Willie: "What's the use? The old man's deaf."

WE THANK OUR MANY CUSTOMERS FOR THEIR PATRONAGE DURING 1929 AND HOPE WE MERIT A CONTINUANCE OF THE SAME THROUGHOUT 1930.

# Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## Reduce Armies As Well As Navies

The outstanding event of this opening month of the new year is the assembling of the naval reduction conference in London, England, upon invitation of the British Government to the other Great Powers, to devise ways and means of securing a substantial lessening of the burden borne by all in maintaining huge navies, while at the same time, they are mutually pledged the one to the other and to all not to resort to war. The conference opens with every prospect of success attending its deliberations, and particularly so in view of the fine understanding already reached between Great Britain and the United States. The hopes and desires of all mankind are wrapped up in its success.

If an accord can be reached in regard to questions of naval strength the next step should, and undoubtedly will be, an endeavor to arrive at an agreement for the reduction of armies and other forms of land armament. Military preparedness, so called, as distinct from naval establishments, imposes an even heavier burden on most nations. Nevertheless, the question of the size of armies seems to present the more difficult problem.

For example, here in Canada we can understand why the United States with the Atlantic, and Pacific, and Gulf of Mexico bounding it on three sides, with its island possessions of the Philippines, Porto Rico, etc., and its ocean borne trade, should feel the necessity of a strong navy, but the majority of our people are at a loss to understand their need of a large standing army and an extensive National Guard or militia.

Following, as it did, the cordial reception tendered Premier Ramsay MacDonald by President Hoover, and the spontaneous acceptance of the invitation to the naval conference in London, Mr. Hoover's Armistice Day speech came as something of a shock in that he laid great stress, many people believe too much stress,—on the old gospel of preparedness and particularly as it applied to the United States. Nor is this feeling allayed in President Hoover's first budget message to Congress, wherein he asks for increased appropriations for the army.

President Hoover's statement that sufficient forces must be maintained to prevent "the foot of the invader landing on our sacred soil," sounded like a sop to the militarists. There does not appear to be the vaguest possibility that any power or combination of powers contemplates any such fantastic step or that it is ever likely to happen. Canada and Mexico are the only two countries whose territory is contiguous to the United States, and this Dominion's permanent force of approximately 3,000 does not constitute a threat, nor has the U.S. anything to fear from Mexico. Why, then, such huge army expenditures?

President Hoover has taken a fine stand on naval reductions and also on the Kellogg anti-war pact, but if real progress is to be made towards world disarmament an even greater measure of enthusiasm must be displayed for reduction in land forces. In his address he referred to the fact that there are ten million men under arms in Europe, vastly more than in 1914. But, instead of attempting to formulate some plan whereby a reduction in these immense forces could be effected, Mr. Hoover seemed chiefly concerned in having the United States build up a bigger army to avoid invasion by these overseas millions.

Real friends of peace would have liked to hear President Hoover issue an urgent call to European countries to immediately start cutting down their armies, and, instead of advocating a still larger army for his country, he could safely have added weight to his plea by favoring a reduction, rather than an increase, in the United States land forces. The war-weary peoples in all countries would have welcomed such a lead from the United States.

Apparently the lesson that preparedness for war inevitably leads to war has not yet been sufficiently impressed upon the minds of the people. An enormous percentage of the four billions of dollars which Mr. Hoover asks Congress to provide in its next budget, is to cover the costs of former wars and to "prepare" for possible future ones. In 1928 the United States spent sixty cents out of every dollar on account of war financing. Another twenty cents went to the army and navy, making a total of eighty cents out of every dollar collected in federal taxes for military—and, in an economic sense, unproductive—purposes.

In that same year in Canada, a pacific nation, spending far less than other countries on war preparation and debts incurred by war, heavy as the latter are, 45½ cents out of every dollar expended by the Government was attributable to war.

In the light of these figures it is clearly evident that, if this damnable doctrine of "preparedness" is to be allowed to continue as the basis of international relations, all the efforts of the League of Nations, all Peace Pacts, all efforts of peace organizations will fail. The people must bestir themselves in order to avert the possibility of future wars.

Some people are hard to please. They are always looking for trouble and are not satisfied when they find it.

## Looking To the Future

### New York Shyscrapers To Have Mast For Dirigibles

Alfred E. Smith, skyscraper builder, has announced that the 1,100 foot tower of the Empire State building will be surmounted by a 200 foot mooring mast for Zeppelin airships through which passengers can descend in seven minutes to the street, instead of landing at Lakehurst, 70 miles away.

Mr. Smith will go to Washington to ask Secretary of the Navy Adams for the help of navy engineers experienced in mooring mast construction.

Already, Shreve, Lamb and Harmon, architects of the 85-storey building, have consulted the engineers of the Goodyear Zeppelin Company, which contemplates transportation lines with the two great airships it is building.

The directors of Empire State, Inc., of which former Governor Smith is president, have come to the conclusion, he said, that in a comparatively short time there would be a trans-Atlantic, trans-Pacific and transcontinental airship lines, and possibly a line to South America.

## THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

### Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

## Fish Fry Transported To Stock Western Waters

### Over Five Million Fish Fry Deposited In Western Waters During Past Year

There should be a lot of new good sport fishing in Western Canada waters in a few years. A report issued by the Canadian National Railways shows that during the current year that company transported 5,352,000 fish fry or eggs for deposit in various waters in Western Canada. Pickerel and the following varieties of trout were included in the shipments: Loch Leven, speckled, brown, salmon, rainbow and Kamloops. The pickerel were all placed in prairie waters and the trout in mountain and foothills waters.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

## Hotel Cecil Is Sold

### Famous London Hostelry Purchased By Oil and Gasoline Corporation

The Hotel Cecil, one of the most famous landmarks between the Strand and the Thames for the last 30 years, and patronized especially by overseas visitors, has been sold to serve as headquarters for a great oil and gasoline corporation. The purchase price was about \$7,500,000.

The Hotel Cecil's disappearance is another proof of the tendency of all enterprises catering largely for visitors, both in amusement and accommodation, to move further westward in the city. The hotel possesses 900 bedrooms, and eleven banqueting halls, being the creation of a notorious financier, Jabez Balfour, who was brought back from refuge in the Argentine to suffer long imprisonment. The hotel was only partly built at the time of Balfour's crash. During the war it was the headquarters of the Royal Air Force.

A golf club has been invented which whistles when a drive is made correctly.

That Sore Throat Needs Minard's.

## Complete Broadcasting Circuit

### Canadian National Forges Last Link In Coast To Coast Radio Chain

By the completion of a broadcasting circuit from Edmonton to Vancouver, the Canadian National Railways have forged the last link in a coast-to-coast chain of radio stations. Announcement of the installation of the new circuit was made recently by the telegraph department of the system. The first broadcast to go over the new section took place on Thursday, December 19, when the Hart House String Quartet played before the microphone at Toronto. Up to the present, the Rockies have been a barrier against consistently good reception of eastern radio broadcasts, but now Pacific coast listeners will be able to hear the best concerts of the other centres of Canada. Contact between all parts of the Dominion may now be maintained by the medium of instantaneous transmission of speech. The vast radio network is an engineering feat which keeps pace with the progress of both Canada and the National system. The radio department will broadcast three hours weekly over the Atlantic-Pacific network and plans are underway for several commercial programmes to reach the coast.

## Good Season For Furs

### First Returns From Trappers In Northern Manitoba Are Favorable

A good fur season in northern Manitoba is indicated by first returns from the trappers, Dr. H. H. Elliott, commissioner for northern Manitoba, announces. During the past few years, the fur catch has been steadily decreasing, but this year a new cycle of successful trapping seems to have started.

The commissioner stated that the new regulations governing fur trade in the province seems to be proving satisfactory.

The number of trappers now working in the north has shown a substantial increase over the 1928 figure, Dr. Elliott asserted.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

## Homes Of Steel

Steel houses, complete in every detail and including a bathroom, electric lights and central heating, are being planned for Paris. The houses can be constructed in eight minutes and can be erected on their sites in a few hours.

## Minard's for the Ideal Rubdown.

Exports of ostrich feathers from South Africa in past years have amounted to \$15,000,000 annually.

# ZAM-BUK

Beats Any Embrocation In Winter Aches & Pains

Try a Box To-Day!

Whilst Zam-Buk has long been recognised as Canada's most popular remedy in skin troubles, how many know how better it is than any poisonous liniment for relieving the sharp twinges of rheumatism, sciatica or lumbago?

Zam-Buk is equally good for aching backs, stiff joints, sore muscles, cold in the head and chest, or sore throat.

Rubbed well into the affected parts, Zam-Buk's powerful pain-soothing essences soak right into the tissues, banishing soreness, congestion and inflammation. Others prefer to treat their colds so; they rub Zam-Buk between the palms of both hands and then inhale the evaporating medicinal balsams. This does the same good in another way.

Also For COLD-SORES 'CHAPS' CHILBLAINS &c

## Sale Of Farm Seeds

### Disposal Of Pedigreed Seeds In Saskatoon Is Increasing Rapidly

A business that is expanding rapidly in Saskatoon is the sale of farm seeds. J. H. Speers estimates that the sales of pedigreed seed in the city has increased at least fourfold in the last five years. And there is still room for further expansion. "Five years ago," says Mr. Speers, "about 10 per cent. of the farmers knew what pedigreed seed was, and how it was procured. Now perhaps 50 per cent. have that information."

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

## Cramped His Style

Old Mose Parker was pretty sick, and the darkey doctor promptly put him to bed and laid down all sorts of rules and regulations as to sleep and diet. After he had gone, Mose turned to his wife and complained:

"Mandy, how does dat dere fool doctor reckon Ah's gwine to eat breast ob chicken every day if Ah ain't got ma ebenin's free?"

The population of the earth is said to double itself every 250 years.

Nearly 4,000 tons of lilies were used in China, this year, to make soup.

## An Extensive Collection

### Man Surprised At Number Of Edgar Wallace's Books

A man recently went into an English library and asked for the complete works of Edgar Wallace. "The result," he said, "was extraordinary. A whole squadron of men marched in to the reading-room with long steel rods over their shoulders. Clamped to these rods were rows of Edgar Wallace's books, in wood. They reminded me of the long poles which vegetable-sellers carry, with onions slung on to them." He said that there must have been in all something like 200 books, including some very early Edgar Wallace poems, in the Masfield manner, now completely forgotten.

## ANGLO-AMERICAN NAVAL PROGRAM SATISFIES JAPAN

Paris.—A new school of thought—that France should lay claim at London, to a larger navy than those of the United States or Japan, and second only to Great Britain—has developed in certain circles here. It is unlikely that the French delegates to the five-power conference will make such a claim, but the popular sentiment must be considered when France contemplates any sacrifices around the conference board.

The claim is based on the contention that France is a greater colonial empire than the United States or Japan, which now outrank it as to naval ratios, and has a greater area and population of overseas possessions to protect.

Tokyo.—Baron Shidehara has informed the cabinet and council, it is understood, that the Japanese government has instructed its delegation to the London arms conference to support a program of Anglo-American solidarity, if the attitude of Italy and France make this necessary.

## Date Announced For Freight Rate Hearing

Appeal Of Western Provinces To Be Considered, January 16

Ottawa.—The cabinet has announced that the freight rate appeal of the western provinces will be heard on January 16. The hearing was to have been held several weeks ago but was adjourned.

The appellant provinces are British Columbia, Alberta and Saskatchewan. Originally these provinces had agreed upon their case, which included the removal of the mountain differential and a revision of the west-bound terminal rates. Now, however, Saskatchewan has withdrawn from the other two provinces and has submitted a separate appeal. This appeal has not, as yet, been made public and it is presumed here that it will be released for publication at Regina.

## Search For Missing Aviators

Canadian Pilots Arrive In Alaska On Way To Siberia

Seward, Alaska. — Carrying three Fairchild planes and a complement of Canadian flyers who are to engage in the search for Pilot Carl Ben Eielson and Mechanic Earl Borland, missing since early November, in Siberia, the coast guard cutter "Chelan" has arrived here.

It fought its way through heavy weather all the way north. The Canadian flyers aboard were Captain H. A. Oakes, in charge, Captain T. M. "Pat" Reid, chief pilot; B. W. Broatch and Gifford Swartman, C. F. Mews and William Hughes, mechanics; Major H. C. Deckard, in charge of the expedition for the aviation corporation, and A. L. Baker, A. Pratt and Whitney, mechanics.

## Sea Musical Festival

Interesting Event To Be Held At Victoria In January

Victoria.—The second annual sea musical festival will be held at the Empress Hotel, Victoria, January 15-18. Handicrafts of the Pacific Coast will be shown, music lovers will be delighted with the Sea Music of All Nations, chanteys of the Old Sailing Ship Days, Sailor Hornpipes and Fisher-Folk Danes.

The second annual mid-winter Golf Tournament will be held at the Calwood Golf and Country Club, Victoria, from February 17 to 22. Free booklets describing these events may be had upon application to the manager of the Empress Hotel, Victoria, B.C.

## Rescue Is Effectuated

London, England.—Exchange Telegraph despatches from Ellington, New Zealand, reported the crews of two whaling expeditions sent out by the Boyd Antarctic expedition had been rescued after their boats had been crushed in the ice. The news was received by the Byrd supply ship "Eleanor Bolling," by wireless. The "Eleanor Bolling" is now at Dunedin, New Zealand.

W. N. U. 1818

## Christmas Ship Disaster

Twenty-Four Lives Lost Off Coast Of Spain

London, England.—A ship disaster in which 24 lives were lost marked a Christmas Day of tempests along the coasts of the British Isles, France and Spain.

A Norwegian steamship, bearing codfish from Iceland, sank off Bayona, northwestern Spain, after terrific gales forced it aground. The ship was bound for Vigo, nearby.

At 1 a.m. fishermen on shore saw its first rocket of distress. Although a heavy fog prevailed, and the storm was so severe that fishing smacks in the inner harbor were damaged, the fishermen struggled to reach the battered vessel. After two hours they approached within 700 yards of the doomed steamer, but could not get closer.

The stricken vessel sank with all hands. Later four bodies were washed ashore, all wearing life-preservers marked "Aslaug." Letters and other documents cast up by the waves indicated the ship carried a crew of 24. No survivors were found.

Lloyd's which received an account of the shipwreck, believed the ship's name to be "Aslaug" instead of "Asland." The "Aslaug" was listed as of 990 tons.

The storm blew out of the southwest, banishing the blue skies and summery weather of Southern England. Rain fell in torrents and hail rattled on the streets of London, England, while wild weather ruled the south coast districts, where Christmas visitors to resort towns watched great seas pound on the beaches and harbor walls at Folkestone and other ports.

## Arrest Italian Extremists

Is Alleged To Have Plotted Death Of Royalty

Brussels, Belgium.—With the arrest of a young Italian in connection with an alleged murderous plot against the Belgian royal family, police expressed the belief they had caught the leader of an extensive group of extremists whose activities have been under surveillance some time.

Camiello Berneri, alias Rosini, was arrested a few days ago after Belgian and French secret agents shadowed him several weeks. A man named Pascale Ruschoni, alleged to be one of his accomplices, was arrested simultaneously; but four other suspects, three Italian and one Dutch anarchist are still at large.

Berneri is alleged to have headed a plot to bomb the Belgian royal train and thus to prevent the forthcoming marriage of Princess Marie Jose, of Belgium and Crown Prince Humbert, of Italy.

The authorities said that an extensive roundup of anarchists and other extremists probably would result from the evidence discovered with the arrests.

## Speech To Be Broadcast

All May Hear King George's Address At Naval Conference

London, England.—Plans are being made to broadcast the King's speech at the opening of the five-power naval conference between 11 a.m. and 1 p.m. on January 21, from the House of Lords. Immediately after his address the King will surrender the chairmanship of the conference to prime minister MacDonald.

The entire two hours of the broadcast which will be between 6 a.m. and 8 a.m. Eastern Standard Time, will not be occupied by the King as this time was allotted in the hope of including the introductory speeches of delegates from other countries.

## Little Demand For Raw Silk

Tokyo, Japan.—As a result of the increasing manufacture of rayon and various other silk substitutes, the consumption of raw silk in Canada and the United States, is considerably less than formerly, according to reports submitted to the Silk Association. Consumption of raw silk in the United States alone during the month of September showed a drop of 6,430 bales from the month previous.

## Will Publish Memoirs

New York.—The memoirs of the late Georges Clemenceau, wartime premier of France, will be published simultaneously in the United States, England and France, late in February or early in March.

## AWARDED FELLOWSHIP

D. D. "Don" Buchanan, son of Senator W. A. Buchanan, of Lethbridge, Alta., in his senior year of modern history honors at Victoria College, University of Toronto, who has been awarded the William E. Wilder fellowship for study abroad.

## Fire In White House

Executive Offices Of President Hoover Damaged By Blaze

Washington.—Swept by a sudden furious Christmas Eve fire, President Hoover's executive offices at the White House were ice-coated and desolate.

Summoned from the dinner table, Mr. Hoover was one of the first to reach the west wing of the White House after the alarm was sounded. Not heeding the smoke which had begun to eddy thickly, he went into his offices and began to carry out furnishings and documents. He was persuaded to leave the room with difficulty, and even then he stood outside and aided others who were carrying out valuables. The flames, however, began to show amid the smoke, and he retired to a nearby terrace to watch until the fire was brought under control shortly after 10 o'clock.

He made a tour of inspection and afterwards, announced that the wing would be rebuilt.

Everything in the west wing save documents and papers in steel filing bookcases and filing cabinets was damaged by smoke and water. The loss is estimated at \$100,000.

## Brought Patients From North

"Punch" Dickens Again Aids Men Needing Medical Attention

Edmonton, Alberta.—C. E. "Punch" Dickens, Western Canada Airways pilot, has brought his plane to Edmonton from McMurray on another "errand of mercy." His passengers, northland residents in need of medical aid, were Dick Dawson, mining engineer, who had suffered from an appendicitis attack; L. H. Forrest, a mine employee, who recently sustained a serious eye injury in an accident, and Fred Jones, who had his hand crushed while working on a drill.

## To Aid Unemployed

Edmonton, Alberta.—Provincial and civic authorities will co-operate to provide work for unmarried jobless men in Edmonton, with the province bearing the expense, it has been announced following a conference between Premier J. E. Brownlee and Mayor J. M. Douglas.

## Will Help Canadian Business

Two-Cent Letter Rate Extended To South America

Ottawa.—Christmas Day marked the inauguration of a two-cent letter rate from Canada to all parts of South America. Announcement to this effect was made by Hon. Peter J. Veniot, postmaster-general.

This letter rate already applies to all parts of North and Central America; and will now apply to the following countries: Argentine Republic, Bolivia, Brazil, Chile, Colombia, Ecuador, the Guianas, Paraguay, Peru, Uruguay and Venezuela.

In making the announcement, Mr. Veniot expressed the opinion that the two-cent letter rate would result in considerable advantage to Canadian business. On this point the postmaster-general commented on the great natural resources of South America, its present day development in transportation and its great trade expansion.

The South American countries, Mr. Veniot intimated, have been invited to reduce their letter rate to Canada, and thus make the arrangement reciprocal.

In addition, the postmaster-general declared, an agreement has been reached with the Argentine postal administration for the extension of the parcel post weight limit between Canada and Argentina from 15 pounds to 20 pounds. Such an arrangement, Mr. Veniot believed would facilitate trade with Argentina, as Canadian commercial houses would be able to ship in large quantities at lower rates than has hitherto been possible.

## Trying To Locate Gold

Christmas Turkey Starts Gold Rush At Sault Ste. Marie

Sault Ste. Marie, Ont.—A gold rush has started on St. Joe's Island and a dressed turkey spread the tip. It all started when a prominent merchant donated a number of turkeys for Christmas to deserving families.

Mrs. J. B. Hammond, who dressed a turkey presented by the merchant, found in its crop a gold nugget valued at \$250. The turkey was one of a shipment from St. Joe's Island, and local prospectors are busy trying to find out just which farm this particular bird came from.

## To Repair Cables

May Take Two Years For French Cable Company To Repair Breaks

Paris.—Two years may be required to repair fully the damage caused to the three French Cable Company lines broken by submarine earthquakes off Newfoundland, November 18.

The three cables were apparently broken in several places. Engineers on the cable repair ship estimated that 150 miles of new cable would have to be laid to replace the torn and twisted sections. The cost probably will be about \$400,000.

## Made Long Hike

Guelph, Ont.—Plodding for 18 miles through the snow-filled road from Guelph, Ontario, to a point seven miles below Arthur, Peter Peterson 80-year-old Arthur resident, has established a record for endurance. He had come to Guelph by train and returned to his home on foot although he had a return ticket in his pocket.

## A UNIQUE SCHOOL ROOM

Above is a picture of the teacher and one of the pupils at the Junior Red Cross Crippled Children's Hospital at Edmonton. All the children are bed cases, but continue their studies during the (sometimes very lengthy) time they are in hospital. In fine weather the beds are moved outside and work goes on in the fresh air and sunshine.

## CRITICISM IS HURLED AGAINST U. S. DRY BOARD

Washington, D.C.—Three more dry members of the senate have spoken their minds concerning present prohibition enforcement conditions.

Borah, of Idaho, Norris, of Nebraska, and Brookhart, of Iowa, all Republicans allied with the independent faction, entered the current controversy with expressions of dissatisfaction with existing enforcement agencies.

Borah, who as President Hoover's most prominent campaigner on the prohibition issue, assailed the entire personnel charged with making the Volstead act effective, and asserted that as now constituted it would never enforce the law.

Norris, who supported governor Smith in the presidential campaign, declared that efforts to suppress the alcohol traffic have never been made in good faith in numerous sections of the country. Enforcement officers, he said, have many times overlooked cases of men with political influence making fortunes through traffic in illicit liquor.

Brookhart came to the support of Senator Harris, of Georgia, in the latter's demand for the removal of Judge Paul J. McCormick, from President Hoover's law enforcement commission. Referring to McCormick's assertion that search of private homes without warrants was an outstanding evil of present enforcement activities, Brookhart expressed impatience "with making the government the criminal in enforcing the law and making heroes out of bootleggers."

## Chinese Foreign Policy

Would Abolish Foreign Navigation Rights Along Coasts and Inland Waters

Nanking, China.—Foreign Minister C. T. Wang, outlining the foreign policy of the nationalist government for 1930, has declared that the work of his ministry during the coming year would be devoted to the abolition of foreign navigation rights along the coasts and inland waters of China.

In addition, Mr. Wang hoped to secure the withdrawal of foreign troops on Chinese soil and the retrocession to China of foreign concessions and settlements.

He added that on Great Britain's initiative preparations were being made for revising the Sino-British treaties, forwarded to London.

## Suspects Are Arrested

Eighty Natives Apprehended In Connection With Bombay Outrage In India

Lahore, India.—Eighty natives were arrested in connection with the bombing of Lord Irwin's train at Delhi.

Three of the men arrested were taken into custody at the camp of delegates to the National Congress.

A force of 500 former soldiers and civilians has been recruited and ordered to patrol the entire European quarter to guard against the possibility of native outbreaks during the anticipated heated controversy at the Congress.

## Predicts Northern Railway

Line From Peace River To Great Slave Lake Certain, Says Colonel Cornwall

Edmonton, Alberta.—Construction of a railway line from Peace River to Great Slave Lake is predicted by Col. J. N. K. Cornwall, veteran northerner, who paid a flying visit to Edmonton on his way to spend the Christmas holidays in Victoria, B.C.

"Northern development cannot be halted," he added. "The region is one of the richest in the world, and its development will really begin when adequate railway transportation is provided."

Alterations of Berlin's network of canals are being planned to make it possible for 1,000-ton vessels to pass directly through the city.

Most of the 3,200,000 people of India live on 6 or 8 cents a day.

Reading Notices, per count line...10c  
Legal Advertising, 16c per count line  
First insertion and 10c per count line  
each subsequent insertion.

Contract advertising rates on applica-  
tion.

Notices of entertainments, meetings,  
sales, etc., at which admission is  
charged, articles sold, or collection  
taken, with the exception of actual  
church services, will be charged for  
at the regular advertising rates.

All advertising changes of copy  
must be in the hands of the printers  
by noon on Tuesday or no changes  
can be made or ads. discontinued.

Paper goes to press Wednesday af-  
ternoon each week.

EDOUARD J. ROULEAU,  
Editor and Publisher

### TEMPUS FUGIT

Time flies—we can hardly believe  
our eyes when we look at the calendar  
and see "1930" staring us in the face.  
Yet it is so. 1929 has passed and the  
year 1930 has been ushered in. It is  
now up to everyone to make the best  
of it. In the past 1900 years nations  
have risen and fallen, but the world  
has steadily progressed. New things  
are being invented daily and many  
others are being perfected—all of  
which help to make this old world a  
better place in which to live.

With the new year let us resolve to  
"do it now" and we will be able to  
accomplish a great many things before  
the year slips by. Time is a precious  
thing and it must be handled as such.  
1930 will never come again, so make  
the best of it.

### THE GREAT WILDERNESS

The Peace River District in Alberta  
is playing a notable part in the edu-  
cation of our American cousins. Joseph  
Smith, of Wolf Creek, has dupli-  
cated the achievement of Herman  
Trell and again the rest of the con-  
tinent sees the wheat king enthroned  
in Canada's north.

About the time the wheat award  
was being announced in Chicago a  
lecturer over a Seattle station referred  
to the great wilderness of Central Can-  
ada, enlarging to speak of the many  
men who were lost in these wilds from  
time to time. The winning of this im-  
portant award by a section of this  
country considerably north of the In-  
ternational boundary will do much to  
dissipitate the wrong information that  
is being circulated and believed in the  
United States, from time to time.

It is well that those of our friends  
in the South as well as many in our  
own Eastern Canada should begin to  
realize the wonderful potentialities of  
the Great West. It is by no means a  
barren wilderness, where the inhabit-  
ants starve to death in the summer  
and enter eternity by the freezing  
route in winter.—Exchange

### ALL FOR ONE, ONE FOR ALL

Investment in your local organiza-  
tion is a put-and-take game—the more  
you put in the more you take out. Fi-  
nances, of course, are necessary to  
carry on the work, but the thing most  
important is how much co-operation  
you put in, how much backing and  
boosting you give that makes for the  
thing that you can take out. Many  
business men show that co-operation  
means protection, better methods and  
a more profitable industry. The trouble  
is that a great many believe this, but  
their belief is one of inactivity. Lack  
of initiative and petty jealousies ac-  
count for much of this state of affairs.  
Holding a grudge against a competi-  
tor is another harmful occupation.  
When this prevails, co-operation is  
high impossible. Co-operation is an-  
other word for education, and educa-  
tion centered in the right direction  
means success.

When hens were 25c apiece; eggs  
were two dozen for 15c; butter 10c a  
pound; the butcher gave away liver  
and treated the kids with bologna.  
Women didn't smoke, vote, play poker  
or dance the Black Bottom. Men wore  
whiskers and boots, chewed tobacco,  
spit on the sidewalks and cussed. Beer  
was 5c a mug and lunch was free. La-  
borers worked 10 hours a day and never  
went on strike. No tips were given  
waiters and the hat check grafter was  
unknown. A kerosene hanging lamp  
and a stereoscope in the parlor were  
the height of luxury. No one ever  
heard of colic, microbes or were  
ever operated on for appendicitis or  
bought glands. Folks lived to a good  
old age and walked miles to wish their  
friends.

### A MERRY CHRISTMAS

Everybody rides in automobiles, or  
flies; plays golf, bridge, or shoots  
craps; goes to the movies nightly; lis-  
tens to grand opera over the radio,  
plays the piano with his feet, smokes  
cigarettes, drinks hooch; blames the  
H. C. of L. on his neighbors; never  
goes to bed the same day he gets up,  
and makes himself believe he is hav-  
ing one hell of a time. These are the  
days of suffragetteing, profiteering,  
rent hogs, excess taxes and prohibi-  
tion. If you think life is worth living  
it is a pleasure to extend you—

### A HAPPY NEW YEAR

—Exchange

### No Rest for the Wicked

Disappointed Convict (back on the  
rock pile after several years): "It  
ain't altered a bit, 'as it? I thought  
after all these years they'd have in-  
troduced some labor saving machin-  
ery."

Merry One: "Cheer up, old man.  
Why don't you drown your sorrow?"  
Sad One: "She's bigger than I am,  
and besides, it would be murder."

.....

It is

"Mama, what's Indian giving?"  
"Taking back what you've given."  
"Oh, I thought that was the instal-  
ment plan."

.....

Judge: What brought you here?  
Accused: Two policemen.  
Judge: I don't mean that—drunk, I  
presume.  
Accused: Both of them.

## Quebec Winter Sports

Vive le Carnaval! Vivent les sports d'hiver! In these  
few words may be summed up the spirit of Quebec  
in winter-time. Here for many years have gathered  
lovers of winter sports and frolics from all parts of  
the western hemisphere.

The ancient capital of Canada is the American  
continent's metropolis for ski-ing, ski-joring, ski-  
jumping, tobogganing, bob-sledding, skating, snow-  
shoeing, dog-team driving, curling, and hockey,  
during the winter months, and in addition has a  
unique attraction to offer the visitor in February  
when the International Dog Sled Derby annually  
takes place.

Winter-sports activities radiate from the Cha-  
teau Frontenac, Quebec's famous hostelry, where  
Jack Strathdee will again be winter-sports director.  
This season he has a new attraction to offer during  
the Ice Pageant, February 12 and 13, when 24 girl  
members of the Toronto Skating Club will perform  
an ice-dance to be known as the "Danse Moderne".  
This will be a veritable "Ziegfeld production on ice."

In all about two hundred skaters will take part in this  
ever attractive and beautiful Pageant.

A record list of entries is promised for the Dog  
Sled Derby this season. Arthur Beauvais, driver  
of the Chateau team, announces that he will have a  
better team than ever. His new huskies were bred at  
Caughnawaga, the Indian reservation near Mont-  
real. At the Dog Derby, February 20, 21, and 22,  
the visitor will see such famous mushers as St.  
Goddard, winner of last year's Derby; Seppala,  
Norwegian hero of many an epic drive; Frank  
Dupuis, and many another well-known figure in  
action for three days over a 123 mile course, mushing  
41 miles a day.

Three internationally famous ski-ing instructors  
will be on the staff of the Chateau Frontenac this  
winter. They are Ivid Nelson, Hans Gunnarsen,  
and Orrice Higgs, of Revelstoke, British Columbia.  
Burnett Burke formerly of the Montreal Amateur  
Athletic Association, will be instructor at the  
Chateau's skating rink.

## Who Does Your Printing?

All business houses need more or less printed matter, all of which  
is within the possibilities of the local printer. Yet how prone  
many are to pass up the home printer and let the orders go to  
city offices which have no interest whatever in rural communities  
except to get printing orders and the cash to pay for them. Busi-  
ness men, remember that the home paper is constantly promot-  
ing the interests of the home community and you owe it to your-  
self and your local paper to back up these efforts by at least hav-  
ing your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

**The Chronicle, Carbon**

Phone: 37

## A BUYING GUIDE!

**B**EFORE you order dinner at a restaurant you consult the  
bill-of-fare. Before you take a long trip by motor-car, you  
porer over road maps. Before you start out on a shopping tour  
you should consult the advertisements in this paper. For the  
same reason!

The advertising columns are a buying guide to you in the pur-  
chase of everything you need—including amusements! A guide  
that saves your time and conserves your energy; that saves useless  
steps and guards against false ones; that puts the s-t-r-e-t-c-h  
in family budgets.

The advertisements in this paper are so interesting, it is diffi-  
cult to see how anyone could overlook them ..... fail to profit  
by them. Just check with yourself and be sure that you are read-  
ing the advertisements regularly—the big ones and the little ones.  
It is time well spent ..... always.

AVOID TIME WASTING, MONEY WASTING  
DETOURS ON THE ROAD TO MERCHANDISE  
VALUE. READ THE ADVERTISING "ROAD MAPS."

## Possibility Of Developing Copper Mines In Far North Sketched By Major Burwash

The possibilities of developing copper mines in the far north, seem best along the shores of Bathurst Inlet, according to Major L. T. Burwash, who returned to Ottawa after having spent eighteen months on a trip through the sub-Arctic which took him some 4 000 miles by boat, behind a dog team and by air.

The veteran of the north, who has mushed behind dogs since 1897, brought with him news of the latest developments in the country which he has grown to know like a book. He thought that the mineral deposits on the Coppermine River, up which he travelled for some fifty miles, would be less valuable than those along the shores of the inlet for which the flying explorers of Col. C. D. H. McAlpine were making at the time they became lost.

Deposits along the Coppermine River, he explained, had been brought in by the ice drift and had been left high and dry, dotted all over the shores. During his trek up the river he picked up large chunks of metallic copper which had been left on caribou meadows when the ice receded. The action has now stopped, he said, and the field cannot be developed until someone finds the source from which the huge nuggets were torn by the ice.

On Bathurst Inlet, however, the copper is in place, he said, and probably exists in great quantities.

Major Burwash was a trifle non-committal on the question of whether or not the development of the copper mining industry in this part of the country might some day reach a stage here that would justify the engineering of a railway from Churchill, 900 miles west, to take care of it.

He thought, however, that should development ever reach large proportions, it would be cheaper to smelt ore on the ground, as coal is to be found all along the Arctic coast of Canada and occurs in heavy deposits at such points as Smoking Mountains and a part of Banks Island where it has been burning since the dawn of history in this region.

Water power is plentiful near the Arctic coastline, at least in a potential state. Most of the rivers flowing into the Arctic, the Major explained, travel slowly across the great plateau land of the interior and then, during the last fifteen or twenty miles of their courses, drop sometimes several hundred feet to a sea level in a series of rapids or cascades, some of which are splendid natural power sites.

Major Burwash, under orders of the Northwest Territories Branch of the Department of the Interior, started his trip on the well travelled route from Fort McMurray down the Mackenzie Valley to Aklavik on board the "Ptarmigan." From there he worked east where he took a dog team and travelled along the coast as far as Boothia Peninsula and the magnetic pole. After making some observations over the pole with the compass and dipping needle he came to the conclusion that the centre of magnetism is deep down in the earth. He explained that the horizontal needle was put out of action owing to the attraction downward through the earth, while the dipping needle, giving the inclination of the magnetic lines for force in the vertical plane was standing almost straight up and down.

From Boothia the Major worked his way back via King Williams Land and was finally picked up at Burnside River by Captain Guy H.

Blanchet, who had arrived on a search flight for the MacAlpine search operations and, during the long flight down, acted as navigator for the planes.

### Fox Farming Centre

Between 1,500 and 2,000 Foxes Now In Saskatchewan Area

According to "The Hub," between 1,500 and 2,000 foxes constitute the present stock in the Saskatchewan region, which is recognized as the centre of the fox fur industry of the prairie provinces. At the big black fox show in Calgary, in 1928, the Saskatchewan foxes captured the primary honors in competition with the best from Alberta, Saskatchewan and Manitoba. Saskatoon is the head office of the Canadian National Fox Breeders' Association (Saskatchewan section).

(By Annabelle Worthington)

A practical woven gingham in yellow and brown tones with bloomers that are cut generously full just peeping beneath, is smart choice for wee folks of 2, 4 and 6 years, sketched in Style No. 2743.

The chemisette with center scalloped closing, scalloped turn-over collar and narrow cuff bands are made of plain yellow gingham. White pearl buttons lend additional smartness.

In the four-year size, it can be copied exactly with 2 1/4 yards of 40-inch material with 3/4 yard of 27-inch contrasting. The saving is worth while.

All the fullness falls from shoulders with attractive flaring hemline. The bloomers have elastic inserted through casing at knees and waistline.

Brown cotton pique with beige pique is very fashionable choice for the little girl for school hours.

Nile green cotton broadcloth printed in novel rings in deeper shade of green with white pique contrast piped in the deep green shade in pique is very unusual combination.

A candy stripe in percale with plain percale in predominating tone is cute.

For warmth you'll like wool jersey in pastel shade as beige, blue, orchid or green self-trimmed save for piping around edge of collar and front of chemisette of self-colour in deeper tone of grosgrain ribbon.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

### WAS PREMIER'S MENTOR

Miss Jean Graham, who taught Dr. J. T. M. Anderson, premier of Saskatchewan, in Humber College Institute, Toronto, in 1898. Miss Graham, who presided over the history department of the school, then the Toronto Junction high school, says that the then future premier was an excellent student of history.

### France Keeping Her Horses

Country Has Made Good the Loss Sustained In War

The automobile is not replacing the horse in France, an official survey reveals.

The total number of horses in France this year is estimated to be nearly the same as in 1913, when the automobile was not a serious menace to horseflesh.

The government survey shows that in 1913 there were approximately 3,200,000 horses in France. During the war millions of them were killed in action while many were eaten for food.

The years following the war looked dark and it seemed for some time that the fields of France would no longer see any horses. It was thought only the rich could afford a horse as a riding mount while the few left over would be sought by the museums.

But the farmers of France have staged a great comeback. They refused to introduce tractors and instead started breeding new herds of horses. As a result France is now well furnished with horseflesh. It is also stated the quality is much better, and that more horses are butchered at an earlier age because the public demands more tender meat. Horseflesh still remains a popular meat in France and special butcher shops proudly bear great metal horses heads over their doors.

That France intends to continue increasing the number of her horses is evident from last year's export and import figures. France imported 17,000 horses, and exported only 7,372.

### See For Themselves

An Irish drill sergeant was putting a squad of recruits through the liffent movements. Try as he would he could get a straight line. Finally, in exasperation, he shouted:

"What's the matter wid yez? Can't ye line up? All of yez fall out and take a look at the line you've made?"

The Carnegie Hero Fund, established 25 years ago, has awarded 19 gold medals, 526 silver medals, and 1,760 bronze medals since that time.

## Advocates Uniform Text Books To Be Used In Schools Throughout The Dominion

### Experiments With Fertilizers

Conference Held At Regina Reaches Decision To Continue Further Investigations

Experiments conducted during the past year into the use of fertilizer have been so successful, that the programme will be greatly extended during the coming season, with a view to determining at as early a date possible, the soil types and areas on which fertilizer may be most profitably used.

This decision was reached at a conference held at Regina, attended by representatives of the Consolidated Mining and Smelting Company, the Canadian Pacific Railway Company, the Massey-Harris Company, the Cockshutt Plow Company, the Dominion Government Experimental Farms Branch, the agricultural departments and universities of the province of Manitoba, Saskatchewan and Alberta, Dominion reclamation and irrigation branch, and the Manitoba Wheat Pool, through whose co-operation the experiments were held.

A similar conference was held a year ago at Trail, B.C., when experiments conducted during the summer of 1928 were discussed.

Experiments of the past summer show clearly that on the whole favorable results have been secured through the application of superphosphates and ammonium-phosphate. Although, due to the large number of experiments covering so wide an area, some did not show increased yields, it was pointed out that the experiments have been under way only for a period of two years and that this was insufficient time to warrant final conclusion.

### Difficulty Encountered By Social Workers

Find It Hard To Protect Self-Respect Of Poor

An experienced social worker was once asked what she found to be the greatest difficulty in trying to carry help into homes of poverty. Without hesitation she replied: "Not to break down their self-respect." This is a delicate yet very practical consideration in such matters. Even the poorest and most unfortunate are entitled to their right of privacy. They may well be tempted at times to exclaim in the presence of what seems to them intrusion, no matter how well meant, that the heart knoweth its own bitterness and a stranger intermeddeth not. Time and again it has been shown that the wisest and kindest and most successful philanthropy is that which takes pains to understand and safeguard the sensitiveness of those whom it is sought to aid.

### For Student Aviators

A radio station is being built at Heston aerodrome which is to be used by flying instructors. Stationed there, the instructors will watch student aviators go through their capers above the building. Instructions will be broadcast from the station to the student flyers above. The pupils' planes will be equipped with receiving sets.

## Latest in Locomotives

The new 2800 class locomotives now being placed in service by the Canadian Pacific Railway mark yet another forward step in the history of motive power.

These locomotives, ten of which are being built for fast passenger schedules, are of the Hudson type and in their speed, power, and efficiency, represent the result of years of experience in designing and construction on the part of the Company's engineers.

The new engines have a wheel arrangement not previously used in Canada, with four wheels in the leading truck, six 75 inch driving wheels

and four wheels in the trailing truck. The weight of the engine is 351,000 pounds and of the tender 293,000 pounds, while the overall length of the two is 91 feet 1 1/2 inches. Like the "fifty-nine hundreds," which were built for the freight and passenger service of the C.P.R. in the Rocky Mountains, they are equipped with the type "E" superheater; are stoker-fired, and have cylinders and underframes cast in one solid piece, weighing about 50,000 pounds. The nickel steel boiler is designed to withstand a working pressure of 275 pounds, and the engine's tractive effort will be in the neighborhood of 45,300 pounds.

Proposal that an interprovincial conference be held with a view to overcoming serious ignorance of their own country prevalent among Canadian school children, not to mention the adult population, was put forward by Dr. J. T. M. Anderson, premier of Saskatchewan, in his address before a luncheon meeting of the Canadian Club, at the Royal York Hotel.

Following his speech, Premier Anderson told an interviewer that he had in mind a meeting, possibly to be made yearly, of officials of provincial departments of education. As a beginning, they would concentrate on achieving uniformity of history and geography text books used in Canadian schools, and on impressing teachers under their supervision with the importance of knowing all about Canada and passing it on to their pupils.

"It might even become reasonable to agitate for a single history and single geography text book to be used all over Canada," he said.

"But the main point is that teachers and pupils and the public generally at present are appallingly uninformed and misinformed regarding the country they live in."

The need of circulating adequate and accurate information about Canada throughout the Dominion was stressed at the very opening of his address by Dr. Anderson, who left Toronto, in 1908, to engage in educational work, later becoming provincial director of education. He has taken an intense interest for some years in the regulation of immigration and the education of new Canadians to fit them to be good citizens.

"It is a pleasure," he remarked, "to drift back to the scenes of my youth and get an opportunity to convey some information about Saskatchewan without being thought boastful. As a school teacher, and one engaged in educational work, I have always felt that a great trouble in the Dominion is that we are not acquainted with each other."

"There are thousands in this province who know little or nothing about the West and not much more about even their neighboring province, Quebec. Worse than this, the average teacher in the secondary schools knows very little about this country, its size, resources, activities and peoples. I deeply hope that the various provinces will get together soon to discuss means of extending knowledge of our own country."

Dr. Anderson asserted that few Canadian children learned that the Dominion was larger than the United States, and 18 times bigger than Germany; that it constituted 23 per cent. of the area of the Empire and was the largest overseas Dominion, and was as large as the whole continent of Europe.

Although Saskatchewan has at least one, if not several, racial problems, the premier said it was far from becoming Communist or Soviet. Recalling his early days as a school teacher in the district, he contrasted the present conditions, pointing out the fact that the great majority of the former foreigners were now staunchly English.

### Ottawa Winter Fair

The Ottawa Winter Fair, opened by Hon. W. R. Motherwell, Minister of Agriculture, on December 2nd, contained the largest display of livestock ever seen in the capital, while for the horse show more than 300 of the finest hunting, saddle and carriage horses in Eastern Canada were present.

"What have you done to yourself?" "Nothing—I am advertising a new strapping plaster." Mokka, Vienna.

"How is it you ask me for a loan when I don't know you?" "It would be hopeless if you did."—Nagels Lustige Welt, Berlin.

## WORLD HAPPENINGS BRIEFLY TOLD

Official France mourns Emile Loubet, former president who died recently at the age of 91.

Diplomatic relations between Great Britain and Russia formally resumed after a lapse of more than two and a half years.

The Canadian and United States delegation to the millennial celebration of the Icelandic parliament will sail from Montreal, June 15, aboard the S.S. Montcalm.

The Portuguese Government has authorized flour mills to import 100,000 tons of foreign wheat before June 1, 1930. The action was taken because of the small Portuguese crop.

A movement to erect a monument to the late Floyd Bennett as a token of Germany's gratitude for his heroism in attempting to rescue the Bremen trans-Atlantic fliers has been started.

The B.C. provincial government is distributing to the municipalities \$550,414 as their share of liquor profits for the six months ending September 30, and \$206,978 from parimutuel taxes.

Canada has registered with the League of Nations her agreement with the United States regarding the admission of civil aircraft; her agreement with Sweden exempting shipping from income tax, and the agreement between Canada, Cuba, the United States and Newfoundland relative to fisheries.

Despite rebates of \$250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$1,150,000 between April 1 and November 20, government officials state. At least \$50,000 more is expected to be taken in by March 31, 1930, the end of the fiscal year.

### Canadian National Places Large Order

#### Will Do Much To Relieve Unemployment Situation In Dominion

Orders have been placed by the Canadian National Railways for 120,000 gross tons of steel required for the construction programme of the National System during the coming year, it was stated officially at Canadian National headquarters. Of this total, 80,000 gross tons have been ordered from the Dominion Iron and Steel Company, and 40,000 gross tons from the Algoma Steel Mills, at Sault Ste. Marie. In addition to steel orders, nearly 5,000 box cars have been ordered. Of the car orders placed, the Canadian Car and Foundry Company are to deliver 2,250 fifty ton box cars, and 25 tank cars, each of 10,000 gallons capacity. The National Steel Car Company have received orders for 1,175 fifty ton box cars, and the Astern Car Company have been given orders for 200 refrigerator and approximately 1,000 box cars. The placing of box car orders has resulted in the manufacturers placing orders with the British Columbia Mills for some 15,000,000 feet of box car material. The placing of these orders has had an important bearing on the employment situation throughout the centres concerned. Inquiries are also being made by the Canadian National among locomotive manufacturers for the delivery of 18 Santa Fe type locomotives and 15 mountain type engines.

### IMPORTANT WESTERN CANADA INDUSTRIAL PLANT

One of the Western Canadian industrial plants, the refinery of Imperial Oil, Limited, at Regina, Saskatchewan, which supplies gasoline and oils for Western Canada consumption.

### Recipes For This Week

(By Betty Barclay)

#### CINNAMON APPLES SUPREME

- 1 package vanilla junket.
- 1 pint milk.
- 6 apples.
- 1 cup sugar.
- $\frac{1}{2}$  cup water.
- 3 tablespoons red cinnamon candies.
- 1 tablespoonful lemon juice.

Peel and core apples and place in baking pan. Make a syrup by boiling the sugar, water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, adding a little syrup. When cooled and the syrup has jellied, prepare vanilla junket according to directions on package and fill dishes. Let stand in a warm room until firm.

#### POTATO STUFFING FOR ROAST GOOSE

- 2 cups hot mashed potatoes.
  - 1 teaspoon grated onion.
  - $\frac{1}{2}$  cup chopped walnut meats.
  - Paprika.
  - 1 teaspoon salt.
  - $\frac{1}{4}$  cup evaporated milk.
  - 1 tablespoon butter.
  - Yolks 2 eggs.
  - 1 teaspoon of poultry seasoning.
- Mix the ingredients in the order given and handle as any stuffing.

### A Good Gardener

#### Saskatchewan School Teacher Wins Silver Cup For Improvement To School Grounds

Michael Evasch'sen is some gardener. For three years a silver cup has been awarded by the Canadian Horticultural Council, of Saskatchewan, for greatest improvement in school grounds during the year. Each time a school taught by Evaschisen has won the cup which was donated for the purpose by Prairie Nurseries, Limited.

Announcement of this year's winner was made at Saskatoon by A. R. Brown, director of rural education for Saskatchewan. The cup goes to the Krasny school district No. 1121, 12 miles south of Shebo. Last year the cup was won by the Wishart school, north of Punichy, and in 1927 by Janwo school, 16 miles northeast of Prince Albert. Evaschisen was the teacher at all three schools, having spent a year in each place.

He is a native of Manitoba, attended school at Dauphin, and took third class normal work in Manitoba. He took his second class at Saskatoon, and spent a year at the Agricultural College.

#### His Worry

A business man returned from the city to find the maid looking scared. "I'm sorry, sir," she said, "but madam had an accident in the car this afternoon, and it's been completely smashed. "Good lord," said the aghast husband, "and my clubs were in the dickey."

### Killed By Chinese Bandits

#### Three Missionaries Are Slain In Most Revolting Manner

The Rev. James G. Kellet, superior of Maryknoll Junior seminary, at Los Altos, Calif., told the Associated Press that he had received by mail details of the murder, in China, recently, of three Franciscan missionaries, Bishop Jans and Fathers Bruno and Rupert.

Father Keller said the missionaries were killed in a most revolting manner, Bishop Jans being literally hacked to pieces. The clergymen were captured by bandits. The death of these missionaries, Father Keller said, brings the total number of Catholic priests killed in China recently, to 22.

#### To Prevent Seasickness

After 36 years at sea, during which time he served as surgeon on the "Aquitania," Dr. S. dney Jones has retired. He has published a preventative for seasickness based on a study of this illness during his life on the ocean. Take no alcohol a week before sailing, eat sparingly, and avoid all acidic foods, is his advice.

The battle of Waterloo lasted only about eight hours.

### Status Of Dominions

#### Conference Brings To Light Important Developments In Empire's Constitutional Position

Another important development in the Empire's constitutional position has resulted from the International Air Conference, just concluded at Paris. Britain and the Dominions, though they signed the 1919 international air convention separately, hitherto had one joint vote at the convention, despite sometimes conflicting interests. Now it has been unanimously agreed the Dominions have separate votes and the alteration is embodied in a protocol which the Dominions have signed in alphabetical order, along with other nations.

#### Cactus That Shoots

Dr. E. C. Leonard, Smithsonian Institution scientist, tells of a thorn-shooting cactus, of Haiti. The slightest jar to the bush will cause the cactus pads to shoot forth in a parabola several sharp thorns. These travel with considerable force, and can penetrate leather at a distance of six feet.

George Washington never lived in the White House. This edifice was not yet completed when he died.

For COUGHS, COLDS, Bronchitis & Influenza

Take PEPS Tablets

25c. box contains 35 silver-jacketed Peps.

### Mid-Atlantic Airports

#### Artificial Islands Look Like Great Ironwork Piers

The idea of making a series of islands across the Atlantic as landing places for passenger-carrying aeroplanes that will one day ply the air between this continent and Europe has for long been the basis of romantic schemes. One such scheme is about to come true, and when it does, there will be eight floating islands between New York and Southampton, forming great stepping stones for the use of aircraft on regular scheduled flights.

These artificial islands are part of the equipment of a concern soon to exploit trans-Atlantic air service. The islands are known as Armstrong seadromes, after their inventor. Construction on them will begin this year. They will be anchored 400 miles apart, and will be landing ports for machines which expect to carry travellers from the United States to England or France in 15 hours.

Seen out of the water, the seadromes look like great ironwork piers. But they will float instead of stand. Thirty-two "legs" will support the seadromes, which will be 1,100 feet long, 400 feet wide and 350 feet high. The floating airports will be 80 feet above water, out of reach of the largest waves. The inventor says the peculiar construction will prevent all rolling or pitching. A hotel will stand on one side of each island, and a hangar and mechanics' quarters on the other.

The food of oysters consists chiefly of microscopic plants which are carried to them by the currents.

## WINDOLITE

MADE IN ENGLAND

## The Improved Glass Substitute

### COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 190 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrel, the cigarette girl, but he doesn't know it. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child Al adores, and sail for France. Al, broken by the loss, becomes a derelict. Months later he drifts into Blackie's place and is saved by Grace Farrel, who makes him promise to stage a comeback. Al falls in love with Grace, and, while Grace is happy in his love, she often wonders what has become of Molly, and is worried.

### CHAPTER XXVIII.

Grace realized that on many occasions when Al was silent he was thinking of his beloved son and wondering how Junior was faring. It was just about a year now since Molly had so cruelly taken him from Al and rushed off to Europe with John Perry. No word had reached New York concerning the elopers since that one message announcing that Molly was suing for divorce. This strange silence in itself was ominous to Grace. She knew that Al's life was inextricably bound up in Junior's and because of that Molly had a hold on him.

Perhaps Al sensed this feeling of instability in Grace. At any rate, he broached the subject near to her heart.

"Grace, you and I are going to be married one of these days?"

It was a question, not an assertion, and Grace looked at him with

gently interrogating eyes, saying nothing.

"Will you marry me, Gracie?"

"Al, you know how I feel. You know I love you—of course I want to marry you. But—"

"But what?"

"You don't even know if you're divorced or not."

"I'm finding that out—the lawyers are working on it now. I would have brought it up before, but I wanted to be well on the way to recovery before I mentioned it to you."

"But what about Junior?"

A faint shadow crossed Al's face, then he drove it away. He had reasoned that out, too.

"I can't have Junior, anyway," he said. "Molly would never give him up. And I do want you, Grace. I want you so much. I love you dearly, I never stop loving you for a single moment. I think you're the most adorable and fascinating and beautiful person on earth."

Grace stepped closer and looked up into his eyes. "And I feel the same about you, Al," she said simply and sincerely.

Meanwhile, what was happening to Molly in Paris?

During the first few months in the French capital and in the brilliant resorts along the Riviera she had been deliciously happy with John Perry. And she loved having Junior with her, too.

But Perry did not like Junior; the child was not his own and he often felt that the little boy came between him and Molly. Molly did not notice this at first, she only found increasing joy in the presence of the dark, handsome Perry. Never for a moment did she regret leaving Al and giving up the fame he had brought her on Broadway. She abandoned herself completely to her adoration of Perry, waiting impatiently for her divorce to be granted. This complete submersion of her character to the whims and demands of Perry astonished even Molly herself. Never had she believed it possible for her to forget herself so completely in thoughts of another person.

The couple travelled from one resort to another, spending money lavishly, but always circumspectly because the divorce had not yet been granted. When they gambled at Deauville or Monte Carlo it was Molly's money that was used, for it turned out that John Perry did not have so much after all. He had earned the reputation of having a fortune simply because of his lavish spending on Broadway.

But during this period the relationship between Molly and John changed perceptibly. It was John who began to show signs of boredom and Molly who became more infatuated. One day when she was moody he did not forgive her as Al had always done. He simply went away and stayed a few days. When he returned in response to her begging letters she loved him more madly than ever.

Then came the day when Perry said, "Molly, I wish you wouldn't have that child around so much. He interferes with our plans and he bothers me terribly."

Molly's voice trembled as she answered, "But I love him, John? What can I do with him?"

"Send him away," insisted Perry harshly. "Send him to a nursing home, or board him out with some family."

Molly gazed long into the handsome, irritated features of the man she loved. She realized she must do as he said if she would hold him. So little Junior was boarded out with a French family. It happened to be a family where he wasn't given good care, so his usually rosy cheeks became thin and pale. He was terribly lonely, too, and he often cried for his mother, his mother who only came to see him once a week now. Vaguely he remembered his daddy back in America, the daddy who had loved him so.

One day Molly realized that her money was dwindling with dangerous rapidity. John Perry asked almost daily for loans, which he wasted in gambling, and never suggested paying back. Molly was afraid to call him to account, afraid even to stop giving him money. With a deadly pain in her heart she sensed that she was on the verge of losing him. If she said a word he might up and leave her at a moment's notice, but if she kept silent he would probably marry her. And the divorce was due any day now.

Shrewd John Perry played pitilessly on Molly's infatuation for him, as pitilessly as she had once used Al's love became more uncertain with each

to further her ambitions. His temper passing day and his demands for large sums of money more insistent.

Then came the day when Molly received news of the divorce. She was wild with happiness as she flung her arms about John Perry's neck.

"Now, John, we can be married! Isn't it wonderful?"

Perry put his hands lightly on her shoulders and looked down into her eyes with a quizzical expression. A show-down was at hand.

"Wonderful?" he said deliberately.

"Well—maybe. And maybe not."

"What do you mean, John? Don't you want to marry me?"

"No; I don't think I do," he answered calmly.

Molly drew back. First her expression was beseeching, then came anger.

"After all I've done for you — to throw me down!"

Perry merely shrugged his shoulders in answer.

Then fury broke loose in Molly. "You cheating dog!" She backed away from him, picked up a vase from a table, and sent it straight toward his head. Perry dodged deftly, smiling as the base smashed in fragments against the wall. With a nonchalant air he picked up his hat and stick.

"Where are you going?" cried Molly.

"I'm leaving. You'll never see me again."

Molly cried all that night. Next morning she received a telegram telling her Junior was dangerously ill!

Back in New York Al had returned to fame and Broadway in a Marcus revue. All over the city you could see the flaming billboards announcing his presence—"Al Stone—Broadway's Famous 'Singing Fool'—as the headliner in the Marcus Revue for 1928. When you walked down Broadway at night you saw his name in yellow lights against the inky sky. His come-back was a complete success.

One night, as the stage doorkeeper at the Algonquin Theatre, where Al was appearing, sat smoking the stub of a cigar, a tidy and expensive little sport car drove into the alley by the stage entrance. Al was at the wheel and beside him sat Grace Farrel. The doorkeeper heard their happy chatter as Al parked the car. The young singer was feeling in particularly good form this evening, for the news had just reached him from Paris of Molly's divorce. That meant that he and Grace would soon be married.

(To Be Continued.)

**Persian Balm**—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose-leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

### Woman Has Busy Life

**Works In Factory and Runs Farm At Eighty-Two**

Another milestone in the busy life of Miss Kate Ralph, Cromwell, Conn., has been reached. Her eighty-second birthday was observed as usual, at her work in the plant of a toy manufacturing company, where she has been employed for sixty-five years. She paints toys. Daily she walks three miles to the factory and then peddles newspapers. Home again at night, she has a farm to look after before she calls it a day. A brother and sister live with her.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Lady (to doctor)—"I'm bothered with a little wart I'd like to get rid of."

Doctor—"You're in the wrong office, lady, the divorce lawyer is next door."

### After Skating

Rub joints and muscles with Minard's to avoid stiffness or ache. Hockey players recommend it.

**MINARD'S**  
"KING OF PAIN"  
LINIMENT

## Needless Pain!

Some folks take pain for granted.

They let a cold "run its course."

They wait for their headaches to "wear off."

If suffering from neuralgia or from neuritis, they rely on feeling better in the morning.

Meantime, they suffer unnecessary pain. Unnecessary, because there is an antidote. Aspirin tablets always offer immediate relief from various aches and pains we once had to endure. If pain persists, consult your doctor as to its cause.

Save yourself a lot of pain and discomfort through the many proven uses of Aspirin. Aspirin is safe. Always the same. All drug-stores with complete directions.

**ASPIRIN**

TRADE MARK REG.

### Man Has Shivered

For Fourteen Years

**Was Torpedoed In Arctic Circle and Has Not Been Warm Since**

The coldest man in London is an omnibus conductor who claims that he has not been warm in 14 years. He told a reporter:

"I was torpedoed on August 8, 1915, in the Arctic Circle, and I've never stopped shivering since. I was serving in the auxiliary cruiser "India," and was four hours on a raft. I still dream of gasping for breath as the seas swept over us.

"Another man and I were interned in Norway, in a desolate spot, and we used to dress to go to bed."

The Medical Correspondent writes:

"It is quite feasible that a mental shock should make a man cold for life. Warmth depends mainly on blood circulation, and pressure which are to a great extent controlled by the secretions of the ductless glands. Ideas or impressions can definitely affect their action."

**It Will Relieve a Cold.**—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

### Oak Tree As Memorial

The million and a half French war dead have been commemorated by a single oak tree which has been planted on the place of the arch of triumph, near the tomb of the Unknown Soldier. This tree is the *Heu* of pilgrimage of thousands of persons daily. It is carefully tended, given plenty of water, and if it dies, it will be replaced, so that there will always, through time, be an oak tree on that spot commemorating the world war dead.

### Minard's Wards Off Grippe.

**Not Under His Own Power**  
Spectator—It was magnificent of you, sir, to dive from that height fully clothed, and effect such a difficult rescue in this mountainous sea.  
The Rescuer—That's all very well, but what I want to know is who pushed me.

"Have you ever driven a car?" the lady applicant for a license was asked.

"One hundred and twenty thousand miles," put in her husband, who was standing near by, "and never had a hand on the wheel."

### Little Helps For This Week

"Blessed is the man whom Thou chastenest, O Lord."—Psalm xciv. 12.

I know that trial works for ends  
Too high for sense to trace,  
That oft in dark attire He sends  
Some embassy of grace;  
May none depart till I have gained  
The blessing which it bears  
And learn, though late, I entertained  
An angel unawares.

—James Drummond Burns.

Be not afraid of those trials which God may see fit to send upon thee. It is with the wind and storm of tribulation that God separates the true wheat from the chaff. Remember, therefore, that God comes to thee in thy sorrow as really as in thy joys. He lays low and He builds up. Thou wilt find thyself far from perfection if thou dost not find God in everything.—Miguel Molinos.

### Falling Hair—Just try Minard's.

### A Flood Of Testimonials

Perhaps the reason Commander Byrd is coming in for some criticism from other explorers is because of the flood of testimonials as to the merits of this and that used by his expedition. These testimonials presumably are well paid for by the recipients. Exploration becomes a little too commercial, perhaps, in such circumstances. But everybody's endorsing something or other nowadays.

Navigators estimate that winds blowing along the sea coast of the Alaskan Peninsula in summer sometimes have a velocity of 80 to 100 miles an hour.

### NERVES WERE BAD

**Could Not Sleep  
Tired All Day Long**

Miss Florence Coutier, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long."

"A neighbor came in to see me, one morning, and advised me to take

"The first box did me good and after the sixth box I was able to go back to my work."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

### Felt Tired and Miserable

"I took Lydia E. Pinkham's Vegetable Compound for miserable and tired feelings and it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite. I sleep well and am in pretty good spirits and able to work every day now. I recommend the Vegetable Compound and you may use this letter as a testimonial."—Miss Delvena Wallace, Union Street, North Devon, New Brunswick.

## The Docks of New York

Two short blasts. Stokers up from  
the hole. Sweeties waitin'. Sailors ash-  
ore for a rouser. Dock dives twinklin'.  
Riotous revelry. Mad abandon. Hearts  
seared in the quick blaze. Tomorrow  
at sea and drudgery. Josef von Stern-  
berg's scorching production of life on  
"The Docks of New York."

**DON'T MISS IT**

### ONE IN EVERY PORT

I had me a girl in Saskatoon,  
So remarked Sambo;  
And she was a lalapaloosa,  
With hair that was flaming and red.

Another in Los Angeles,  
A little bit shy and demure;  
If you asked her out to supper,  
She never was really quite sure.

A peach of a honey in Frisco,  
She was gentle and so shy;  
She didn't know much, you would fig-  
ure,  
But, oh, how she's wallop your purse.

And my baby from out in St. Looney,  
What a dinger was that little kid;  
And say, you should look at her cellar,  
She never had heard of the lid.

Whenever we made Oakland,  
I had me a good steady home;  
My cutie was one little queenie,  
You'd have thought I was Nero in  
Rome.

But the steady at home in Carbon  
What a sweetie and golly, what pep;  
Then other ones all seemed like hoo-  
sers,  
When me and this birdie would step,  
(With apologies to L.H. Addington).

### KEEP AT IT

One step won't take you very far,  
You've got to keep on walking;  
One word won't tell folks who you are  
You've got to keep on talking.  
An inch won't make you very tall,  
You've got to keep on growing;  
One little ad. won't do it all,  
You've got to keep them going.

A constant drop of water  
Wears away the hardest stone;  
By constant gnawing, Towser  
Masticates the toughest bone;  
The constant cooling lover  
Carries off the blushing maid;  
And the constant advertiser  
Is the one that gets the trade.

There is often a great deal of hu-  
mor in advertisements. The following  
are a few choice examples:  
Gentleman wants shooting.  
Wanted, a horse to do the work of  
a country minister.  
Wanted, by a young woman, her  
passage to Canada. Willing to take  
care of children and a good sailor.  
Inventor of new type of go-cart  
wishes to meet financier to push same.  
Widow wants washing.
